

Rise Group Benefits Administration

Simplified group benefits administration that makes life easier

Managing group insurance benefits efficiently and effectively is a piece of cake with Rise. Everything you need is in one place—and seamless integration with HR and payroll makes it even easier.

Online benefits enrolment

Say goodbye to paper enrolment forms once and for all. Now employees can self enrol in group benefits by entering all their information in a single online system. You'll never have to chase them again.

Streamline benefits administration

Managing group insurance benefits efficiently and effectively is a piece of cake with Rise. Easily manage plans, and make changes—add dependants, make salary changes, and more—with the assurance that premiums and deductions are in sync across systems.

Never miss a beat

Now you no longer need to enter employee data separately in your HR, benefits, payroll, and time and attendance systems. Rise's integrated solution ensures you only have to enter employee data once every time you have a new hire, termination, or life and employment changes.

Reduce administrative overhead

Rise manages all your group benefit premium allocations, tax treatments and collections from employees. We've eliminated the entire time-consuming loop of adjustments and reconciliations, ensuring there are no costly discrepancies between your carrier bill and payroll.

Eliminate payroll accounting errors

Rise ensures that your insurance carrier will always be aligned with changes to employee salaries or status, helping you eliminate payroll accounting errors. Plus, you'll never pay out claims to unqualified employees who are no longer with your company.

All-in-one experience

Give your employees the best benefits experience possible that's truly all-in-one. Rise delivers an integrated plan member experience—starting at new hire onboarding—and triggering a digital benefits enrolment that makes things faster and easier for everyone.

We look forward to working with you!
